

Peaceful Sounds Beautiful-Sonesse™ 30

Introducing Sonesse™ 30

Today, the serenity of interior spaces is enhanced with a revolutionary motor. The award winning Sonesse™ 30, designed by Somfy, is putting roller shades, roman shades and wood blinds into motion with quiet precision. With various control options and power configurations, the Sonesse™ 30 can suit most any application...quietly.

The Sonesse™ 30 offers the performance and control that you expect from Somfy.

The addition of Sonesse™ 30 to the Somfy product line offers an exceptional benefit to consumers. Motorized window coverings already offer comfort, convenience and control and are now available with superior noise reduction technology to create a peaceful environment for consumers' lives.

What's more, Sonesse™ 30 offers a variety of control options, including Radio Technology Somfy® (RTS) which allow for control of individual window coverings or groups of window coverings from the same transmitter. And, the new motors are capable of adjusting to precise intermediate positions for increased control flexibility.

Technical Specifications for Sonesse™ 30

Tube Size	1.5"
Voltage	24V DC
Torque	2Nm
Lifting Capacity	23.5lb
Minimum Width	18"
Switch Type	Electronic Limit Switch
AMP Draw	1A
Noise Rating	44 db
Radio Frequency	433,42MHz
Approximate Light Gap	½" to 1"
Home Automation Integration Coding	Compatible with Infrared, Dry Contact and RS-232 via Somfy Multi-Link™ controls.
Coding	Rolling code of 16 million possibilities

Quiet
At only 44 dB at 3 feet, it can barely be heard.

Flexible
Multiple control options available including Radio Technology Somfy®

Easy to Install
Simplified plug-in wiring makes installation simple and effortless.

Precise
Optimized intermediate positions

Discrete
Ultra-compact and easily concealed within cassette systems and headrails
