Starburst	Sunset	Quarter Round	Trapezoid	Octagon		M NM					Y N	6Ft 12Ft

Stationary Starburst Shades

All non-perfect Stationary Starburst arches require a template which must be made from brown craft paper.

Movable Starburst Shades

Starburst Movable arches are cut to perfect half circles only and do not require a template. The height must be exactly 1/2 the diameter. The hinge gap (gap between the two rails) is not centered in the window. The moving rail is always smaller than the stationary rail to provide proper movement within the window.

Quarter Round Shades

All non-perfect Quarter Round Shades require a template which must be made from brown craft paper. The horizontal (moving) rail of a Movable Quarter Round shade must be smaller than the vertical (stationary) rail in order to allow clearance for the moving rail.

Sunset™ Arches

All Sunset arches which are not perfect half circles require a template. Depending on the curvature of a particular arch, it may be necessary to use the two string method to ensure proper fit and operation of your Sunset shade. Comfortex will determine the best stringing method after examination of the template.

Trapezoid Shades

Please provide measurements for all four sides when ordering. No template is required. The maximum slope of the top rail is 30 degrees from horizontal. Trapezoid sides must be parallel.

Octagon Shades

All Octagon Shades require a template. Template must be cut out of the paper. The width, length and one side are required measurements when ordering.

Important Information on Templates:

On the front of the template, mark the shade measurements along with your company name, account number, sidemark, shade style and color. Indicate inside or outside mount, the room side and which ends of the template are top and bottom. The factory will make all necessary allowances for inside mounts.
